

KEYSTONE HIGH SCHOOL

Dear Parents/Guardians,

The Ohio Department of Health School Immunization Requirements have been revised to include one dose of **Meningococcal (MCV4)** vaccine to be administered before a student enters the 12th grade. Therefore, if your student has not received the Meningococcal (MCV4) or provided a record to the school of the vaccine received after age 15, your current 12th grade student will need to show proof of having received the Meningococcal (MCV4) vaccine as soon as possible.

Please contact your physician or the Lorain County Health Department (440-322-6367) to schedule an appointment.

This form must be completed and returned to the school by October 13, 2017.

James Kohler- Principal
James.Kohler@keystoneschools.org

Dana Corraini- Clinic Nurse
Dana.Corraini@keystoneschools.org
